PROFESSIONAL SUMMARY

Fourth-year Software Engineering student at Wachemo University and passionate Fullstack Developer with 3+ years of hands-on experience developing and deploying modern, scalable web applications. Successfully delivered 10+ complete projects bridging responsive, user-centric frontend interfaces with robust backend architectures and RESTful APIs. Expert in the modern JavaScript/TypeScript ecosystem, specializing in React, Next.js, Node.js, Express, Tailwind CSS, and MongoDB.

TECHNICAL SKILLS

Frontend:	React.js, Next.js (App Router & Server Actions), JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5, CSS3, Framer Motion, Responsive & Mobile-First Web Design
Backend:	Node.js, Express.js, RESTful API Design & Integration, JWT Authentication, Server Architecture
Databases:	MongoDB, Mongoose, Data Modeling, Schema Design, Aggregation & Indexing, SQL
Tools & DevOps:	Git, GitHub, Postman, Docker, Vite, Vercel, Netlify, CI/CD Workflows, npm
Core Competencies:	Clean Code Architecture, Software Engineering Principles, UI/UX Design, Agile Collaboration

FEATURED PROJECTS

Warka Furniture — Modern E-commerce Platform

[warkafurniture.vercel.app](#)

Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, Stripe API

- Engineered a full-featured e-commerce storefront and brand showcase for handcrafted Ethiopian solid hardwood furniture with bilingual support (English / Amharic).
- Implemented dynamic product catalogs, category filtering, cart management, and custom joinery inquiry flows.
- Integrated secure payment processing with user authentication and high-performance server-side operations.

Developer Portfolio Website — Personal Brand & Showcase

[nahom-portfolio-six.vercel.app](#)

Tech Stack: React, Tailwind CSS, Framer Motion, Vite, Vercel

- Designed and deployed a personal brand portfolio featuring interactive glassmorphism UI cards, micro-animations, and light/dark themes.
- Built client-side workflows including automated CV downloading and prefilled direct contact links.
- Optimized for mobile responsiveness, SEO best practices, and fast loading performance.

Our Flavor — Restaurant Web Application

[ourflavor.netlify.app](#)

Tech Stack: JavaScript (ES6+), HTML5, CSS3, Responsive Design, UI/UX

- Developed an engaging, responsive web application for authentic Ethiopian cuisine featuring online ordering capabilities and interactive food menus.
- Designed accessible, mobile-first interfaces ensuring an intuitive user journey from menu browsing to order placement.

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering

Expected Graduation: 2026

Wachemo University, Ethiopia

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Technologies, Software Architecture & Design, Operating Systems, Computer Networks.
